General Sales Conditions

All customer's orders to RS Barcelona mean full acceptance of the following General Sales Conditions.

- All prices are Public Price in € and EXW Barcelona.
- Taxes not included.
- Orders must be confirmed in a written form.
- RS Barcelona will own the goods until order's full payment.
- Estimated shipping date will be informed at order confirmation.
- Order cancellations after 48 hours of placement will incur a cancellation fee of 10% of the order value.
- Claims after 48 hours of delivery will not be accepted.
- Returns will not be allowed without prior authorization from RS Barcelona.
- Transport costs are not included (see shipping terms and costs table).

QUICK SHIP

- QS products, marked with a blue sticker, are shipped within 48 hours after order confirmation.
- QS products are always standard finishes (check the finishes shown in our price list).
- Standard football tables are always:
 - 2 feet players
 - Male players
 - Mixed light and dark skin players
 - You can choose the players line up: C1 (3-3-4) or C2 (2-5-3)
- QS does not include multiple and combined orders.
- RS Barcelona reserves the right to inform the client if QS inventory is depleted.

LEAD TIMES

Delivery times depend on the product category and the Customization type:

- QUICK SHIP: Shipped within 48 hours after order confirmation.
- STANDARD finishes: 2-4 weeks (4-6 weeks for Track Collection).
- CUSTOM finishes (check The Customization Guide): 4-6 weeks
- SPECIAL products (exclusively made for you): check options, availability and lead times

RS Barcelona reserves the right to modify the lead times according to the availability and manufacturing changes. The above lead times don't apply for orders with multiple items. It will be quoted case by case.

SHIPPING TERMS AND COSTS

- Delivery is based on a door-to-door service (curbside delivery). Palletized products require the recipient to provide the necessary unloading equipment, both for delivery and pickup.
- If no unloading equipment is available, the feasibility of delivery with the standard service must be assessed.
- Additional services are quoted on a case-by-case basis (indoor delivery, extra personnel, small truck for restricted access, lift or crane delivery, assembly service, etc.).
- RS Barcelona reserves the right to apply a surcharge at any time if an additional service is required and was not specified at the time of purchase.
- In the event that the collection or delivery of goods exceeds the agreed-upon timeframe, RS Barcelona will apply an additional storage fee of 150 EUR for every four-week period beyond the scheduled date. Additional storage charges may also accrue depending on the duration of the delay.

Exceptions

Please, pay attention to the following exceptions and ask for quotation if required:

· Countries not listed in any group are quoted case by case.

* Deliveries to Formentera, Canary Islands, Ceuta, or Melilla. are not included and are quoted case by case.

** Deliveries to islands (like ski resorts, etc.)and remote areas might incur in additional charges.

*** Andorra, Switzerland and UK: Sold under DAP terms (the import clearance and taxes are not included).

IMPORTANT: The recipient is responsible for reporting any visible damage on the carrier's delivery note at the time of receipt. Otherwise, RS Barcelona will not accept the claim arised against transportation damage.

Are you planning to place a large order and want a better price?

Please contact us and we will send you a competitive quotation.

Materials

Top quality, the ability to withstand intensive use, and long-lasting durability. These are concepts we take for granted when we're looking for an item to incorporate in our lives. Durability is the cornerstone of all the decisions we make in our product development process. We select materials and use manufacturing processes that ensure optimal toughness and longevity.

As designers and manufacturers, at RS Barcelona we're committed to exclusively using materials that meet the highest standards of sustainability and social responsibility at any point of their life cycle. To have full knowledge of their source, in order to ensure that they can be transformed and reused, and that they do not contain environmentally harmful chemical components. We meet this challenge in order to be able to guarantee that RS Barcelona pieces are manufactured with materials that protect and are respectful of people's health and the environment.

Certificates and Labels

Steel

The metal we use in the manufacture of our pieces is **steel-alloy DC01** and **stainless steel-alloy AISI 316**, one of the highest quality standards.

Wood

All the wood we use in our products is sourced from sustainably managed and environmentally-friendly forests with **FSC/PEFC certification**. Moreover, we do not use any raw materials sourced from species on the CITES (Convention on International Trade in Endangered Species of Wild Fauna and Flora) list.

HPL

The HPL boards we use comply with the **EN 438** and **ISO 4586** standards and also comply with the **E1 standard on formaldehyde emissions/concentration**. In addition, they have an antibacterial treatment that reduces health risks from cross-contamination, complying with **ISO 22196:2011**. **BioCote®** with silver ions technology reduces the level of bacteria on the surface by up to 99% and also ensures that it can be safely in contact with foodstuff.

Paint

The manufacturers of the paints used in RS Barcelona's products —mainly polyester powder coating— hold the **EU Ecolabel certificate**, **AENOR ISO 9001/2008 certification** and **ISO 14001/2004 environmental management certification**.

Fabrics and upholstery

For our upholstered items, we only select fabrics with **GREENGUARD Gold certification** and comply with the **UL 2818 VOC emissions standard** (UL 2818 - 2013 Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings).

Moreover, our fabrics have passed the following regulatory tests for fire resistance, flame spread, heat emissions, fire reaction and smoke emission: **AS/NZS 1530.3-1999** / **AS/NZS 3837-1998** / **DIN 4102-1B2 (1998)** / **California Technical Bulletin 117 (2013)** - **ASTM E1353-08a (2013)** / **EN13501-1**.

They are also **free of phthalates** and hold **environmental product declarations (EPD)**, in compliance with the **EN15804** standard.

Recyclability

Our approach to product conception factors in strategies for a responsible end of use. Items can be easily dismantled into separate pieces, ensuring that most of them can be repaired, in order for the product to recover the use it had when originally purchased. And when this second use is no longer feasible, we ensure that the item can be recycled to the greatest extent possible and turned into something else. So the recyclability of our products reaches 98%*.

* Recyclable on a weight basis, in accordance with current waste disposal programmes. The recyclability calculation does not include packaging.

Care and maintenance

RS Barcelona products are manufactured of high-quality materials to last over time. Although age can catch up with us, it is possible to retain not only their longevity but their appeal and beauty. Therefore, as with any product that we love and wish to preserve and protect, they require regular care and maintenance, which should be increased in pieces that are used outdoors.

- Carefully read the advice and tips. You can also find them in the User's Manual included with each product and on our website, in the Downloads tab on each product page.
- There is not a "one size fits all" statement for the maintenance frequency of the products. It will highly depend on the environment in which they are placed (indoors, outdoors or covered outdoors; by the sea or close to a swimming pool; in very high moisture conditions or in areas with frequent rain...). For this reason the periodicity of maintenance must be set according to how the product and materials perform in their environment.
- If the product is to remain out of use for extended periods of time or in severe weather conditions, it should be protected with an optional cover and/or moved to a covered area or indoors to avoid dust and moisture, which are main causes of mildew and corrosion.

Wood

Wood is a living material and it constantly adapts and transforms with changes in temperature and humidity. Therefore, although it does not require special care, it does require regular maintenance to keep in good condition. The better you treat it, the longer it will last and the better it will look.

Iroko

Iroko is an African hardwood especially for outdoor use. It can vary in Color, or even crack due to humidity or sudden changes in temperature. Over time and in the open air exposed to elements, iroko undergoes a natural oxidation process, taking an aged silver-grey tone that makes it attractive and gives it a lot of personality.

Our iroko pieces had been treated with an oiling wood protector to prevent moisture. However, this protection naturally vanishes over time. If you want to keep this natural finish, treat the iroko with a natural oil protector. For a more resistant protection, treat it with a waterproof sealer. In both cases, we recommend treating the iroko wood every three months, or more frequently at dining and hospitality spaces, always following the oil or sealant manufacturer's instructions.

- Clean the dust frequently.
- Clean with a cotton damp cloth in warm water and dry it fast with another cloth.
- For a deep cleaning you can use a damp cloth in warm water and a mild soap.
- Never use abrasive soap or detergent, sandpaper or steel wool since they could scratch the surface or make Colors fade.
- Never use furniture cleaning or polish products containing wax, since this kind of product tend to leave a sticky layer on the surface that attracts and catches dust and dirt.
- To remove stubborn dirt, simply use a stiff brush and a little water.
- Always scrub carefully to avoid damaging the fibres.

In the case of football, ping pong and pool tables, we always suggest the use of the protective cover whenever the piece is outside and not used for long periods of time, such as in winter.

Walnut and Oak

Walnut and oak are natural woods for indoor use only. Natural woods are high quality woods that bring an attractive appeal and a long life to the pieces. However, they require good maintenance and care so that they always look new.

Avoid hard blows and always use place mats or coasters to avoid marks and rings if placing drink ware or tabletop items on the surface. If liquid comes in contact with the surface, dry it quickly with a cloth. Never place hot items directly on the wood, since the heat can damage the surface and alter the Color and finish.

Cleaning:

- Cleaning the dust frequently and immediately after use with a damp cloth (preferably of cotton) will prevent fluids from penetrating deep into the wood.
- Clean with cotton damp cloth in warm water and dry it fast with another cloth.
- For a deep cleaning you can use a damp cloth in warm water and a mild soap.
- Always clean gently in the direction of the grain.
- Never use abrasive soap or detergent, sandpaper or steel wool since they could scratch the surface or make Colors fade.
- Never use furniture cleaning or polish products containing wax, since these kinds of products tend to leave a sticky layer on the surface that attracts and catches dust and dirt.
- Avoid exposing the wood to direct sunlight, as heat can damage the wood alter its Color and shine.
- Water and moisture can also damage these woods, so try to keep them as far away as possible from these elements.

Steel and Stainless steel

For the optimal conservation of pieces manufactured in steel and stainless steel, especially if they are exposed to the elements, periodic maintenance is advised.

All the steel of our products for outdoor use (except the ones made of stainless steel) is treated with cataphoresis, a special treatment that prevents corrosion of metal parts. Cataphoresis, also called electrophoresis deposition, is an anti-corrosion surface treatment that consists of electrochemically depositing an epoxy-type coating on the metal pieces like steel, cast iron, aluminium, magnesium, etc. To carry out a cataphoresis treatment, the metal piece is immersed in a water-soluble paint bath where it is polarised via an electric current. This allows the paint particles that are suspended in the bath to migrate and deposit uniformly on the entirety piece, also the hollow areas, concealed areas, sharp edges, etc., which fully protects it from corrosion. More over, cataphoresis is an eco-friendly treatment, since it requires the use of very few chemicals.

For maximum resistance to corrosion, steel surfaces must always be kept clean of dust and other elements, as dirt is the worst enemy causing corrosion. This maintenance must be tailored to the conditions to which your product is exposed (dust, dirt, humidity in combination with heat, salty or potentially corrosive environments, etc.). This can vary from one to four times a month, in normal settings, or up to once a day in cases of unhygienic or very rough conditions.

In any case, it is necessary to prevent these products from being exposed to moisture for extended periods of time and to clean and maintain them periodically. It is also very important to avoid scratches to the painted surfaces as this exposes the metal to moisture and thus encourages the development of corrosion.

You must be the one who adjusts and evaluates the periodicity of the maintenance according to how the steel or stainless steel reacts, increasing or reducing it depending on what is necessary for proper product care. In any case, we recommend cleaning it at least once a week, as a starting point.

Please follow these simple cleaning instructions to keep the product in good condition:

- Remove dust and dirt first to avoid possible scratches when rubbing with a damp cloth.
- For cleaning both steel and stainless steel, use only a damp cloth in warm water and mild soap.
- Never use abrasive soaps or detergents, as they can leave scratches and produce discoloration.
- Rub gently with a damp cloth. Rinse and wring the cloth frequently, to keep it moist. Make sure to rinse well and dry with another cloth.
- If the event of a spill, clean it up as quickly as possible.
- If you are unable to remove the stains with a damp cloth, apply a steel or stainless steel cleaner to the surface with a cloth. Read the instructions from the cleaner carefully, and test it first on an inconspicuous spot. Make sure to rinse well and dry with another cloth.
- When the piece is extremely dirty, with stains, incrustations or signs of surface discoloration due to long periods of neglect or poor maintenance, we recommend contacting professionals to restore the surface's initial appearance.

• For the stainless steel pieces, to eliminate possible rust stains that may appear due to a porosity defect, humidity, or misuse, it is best to use a product directly to remove rust spots.

In the case of foosball tables, pool tables and ping pong tables, we suggest the use of the protective cover whenever the piece is outdoors and is not used for long periods of time, such as in winter time.

Aluminum

Clean the aluminum on a regular basis with a damp lint-free cloth that has been wrung in a mixture of lukewarm water and a mild detergent. Wipe the surface dry with another lint-free cloth.

Never use corrosive or cleaners, soaps or detergents, as they can leave scratches and produce discoloration. Avoid the use of scrubs pads or pressure cleaners, as these may cause damage.

When the product is extremely dirty, with stains, incrustations, or signs of surface discoloration due to long periods of neglect, or poor maintenance, we recommend contacting professionals to restore the steel's initial appearance.

HPL (High Pressure Laminate)

The HPL used in our products, in addition of being of high quality, has an antibacterial treatment that allows it to be in contact with food with total guarantee and hygiene.

Although HPL does not require any special maintenance and care apart from normal cleaning (as you might do with any everyday piece) it is very important to keep it clean, especially if it is also used as a dining table.

Cleaning:

- Clean with a damp cloth in warm water and mild soap.
- Never use abrasive soap or detergent, sandpaper or steel wool since they could scratch the surface or make Colors fade.
- Never use furniture polish, which contains wax, since these kinds of products tend to leave a sticky layer on the surface, which attracts dust and dirt.

If the product is used outdoors, keep it clean and in good condition, following these instructions more frequently.

Fabrics

To enjoy your upholstery textile for a long time, cherish it and use it properly. Keep your textile as clean as possible to preserve it in the best condition and last for long. Make sure it is cleaned regularly using a vacuum cleaner set to medium to low power and clean with a brush or dry cloth. If a hole is made, it could damage the fabric. So always be careful with shoes, trousers and sharp objects.

Gorina Basalt: Diagonal indoor cloth

Composition: 85% worsted wool and 15% nylon

To enjoy the cloth for the longest time and many memorable games, use it and maintain it correctly.

- Keep the cloth as dust-free as possible and be sure to clean it regularly, using a vacuum cleaner on medium or low power or using the brush provided with the pool table.
- Never clean it with any kind of liquid, not even water, as the fabric may become disColored.
- This fabric may present slight color variations between batches.

Kvdrat – Uniform Melange: On the road cushions

Composition: 68% new wool, 22% nylon and 10% polyester.

As they are removable casings you take them out and wash them in the washing machine, following these instructions:

- Wash at max. 30°C and use mild process.
- Use washing detergent designated for Colored textiles and follow the manufacturer recommendations.
- Never use bleach.
- Wash the fabric inside-out and load only half on the machine.
- Spin-dry the fabric with decreased speed.
- Do not tumble dry.
- The covers should be dried while suspended and mounted or applied while still slightly damp in order to ease the process.
- If you iron it, use a low temperature (max 110°C) without steam as moisture can cause damage to the fabric.

- If you choose professional dry cleaning with tetrachloroethylene, use a normal process.
- In case of greasy stains or liquid spills, if you act quickly, it is not difficult to remove them and prevent stains from forming. First, scrape off any liquid or hardened residues with a spoon or a scoop. Any loose particles must be vacuum cleaned. In case of liquid, soak up with an absorbent napkin or cloth. Edge marks can be avoided by dabbing gently in circular motions towards the centre of the stain with a clean lint-free cloth. Remove non-greasy stains by carefully dabbing with lint-free cloth or sponge wrung out in warm water. Remove greasy stains by using appropriate detergent or solvent. In all cases, we recommend to test stain removal agent on an inconspicuous area first, to see if there is any effect on the fabric. Make sure to dry the fabric fully before use. It may also be necessary to use a hairdryer to avoid leaving edge marks.
- Rinse thoroughly with clean water.
- Allow the fabric to dry in the open air.
- Retreatment of fabric for water and stain resistance will be necessary.

Sunbrella – Natté: You and Me outdoor cushions and Sunbrella: Diagonal outdoor cloth

Composition: 100% acrylic

Sumbrella's Natté fabric is highly suitable for outdoor use as it is mold and mildew resistant, UV resistant, breathable and water and stain repellent.

As they are removable casings you take them out and wash them in the washing machine, following these instructions:

- Before washing, remove the dirt that has been deposited with a soft bristle brush to prevent it from becoming encrusted.

Hand washing:

- Soak fabric in a solution of 20 ml of mild soap per litre of warm water.
- Use a sponge or very soft bristle brush to lightly agitate the stain.
- Rinse thoroughly to remove all soap residue.
- Allow fabric to air dry.

Machine washing:

- To wash, first close all zippers.
- Wash in cold water on the delicate cycle.
- Use mild laundry detergent and follow the manufacturers recommendations.
- In case of deep stain or severe mold or mildew, you can add 60 ml of bleach.
- Allow fabric to air dry.
- Do not tumble dry.
- Never use professional dry cleaning.

In case of greasy stains or liquid spills, if you act quickly, it is not difficult to remove them and prevent stains from forming. The quicker you clean spills and stains, the easier they can be to remove. First, scrape off any liquid or hardened residues with a spoon or a scoop. Any loose particles must be vacuum cleaned. In case of liquid, soak up with an absorbent napkin or cloth. Remove non-greasy stains by carefully dabbing with clean and dry cloth. In case of oil-based spills, apply an absorbent such as corn starch, then remove with a straight edge. Spray on a mild cleaning solution of soap (such as Dawn or Woolite) and water. Rinse the fabric thoroughly to remove all soap residue and air dry. In all cases, we recommend to test stain removal agent on an inconspicuous area first, to see if there is any effect on the fabric. Make sure to dry the fabric fully before use. It may also be necessary to use a hairdryer to avoid leaving edge marks.

Mold and mildew stains:

- Prepare a solution of 60 ml of bleach and 20 ml mild soap per litre of water.
- Spray on entire area and allow to soak into the fabric for 15 minutes.
- Clean entire area with a sponge, clean cloth or very soft bristle brush.
- Rinse the fabric thoroughly to remove all soap residue.
- Allow fabric to air dry.
- For severe mold/mildew growth, bleach quantities may be increased.
- It is best to clean the entire surface area of the fabric to avoid water rings and stains.
- The covers should be dried while suspended and mounted or applied while still slightly damp in order to ease the process.
- If you iron it, use a low temperature (max 110°C) without steam as moisture can cause damage to the fabric.
- Rub the mixture to act on the fabric.
- Rinse thoroughly with clean water until the cleaning solution is completely removed.
- Allow the fabric to dry in the open air.

For more intensive cleaning to get rid of mould:

- Prepare a solution with 1/10 bleach, 2/10 soap, 7/10 water.
- Scrub the fabric with the solution and a soft brush.
- Allow the solution to act for 15 minutes.
- Remove the solution using a sponge or a clean towel.
- Rinse thoroughly with clean water.
- Allow the fabric to dry in the open air.
- Retreatment of fabric for water and stain resistance will be necessary.

Marble

Marble is a noble, very resistant stone that offers natural elegance and attractiveness to any piece. It is a porous material and stains can easily penetrate.

For this reason, you should pay attention to the following guidelines for its cleaning and care so that it can show off its original grain and all its natural appearance.

- Apply protective pads to undersides of items being displayed on marble surfaces.
 - Wipe up spills immediately with a soft, clean and dry cloth.
 - For daily cleaning we recommend the use of only damp cloth.
 - If you use soap, use a neutral PH one or detergents for marble on a soft, clean and dry cloth. Carefully read the instructions on the detergent's label. We recommend to test it on an inconspicuous area first, to see if there is any effect on the marble.
 - Do not use ammonia, bleach and highly alkaline or acidic cleaners, which can damage the marble and it can lose its natural brightness.
 - Alkaline or acidic liquids (lemon, vinegar...) can damage the marble. Remove the liquid as quickly as possible with a dry cloth and clean the marble with another damp cloth with water.
-

In the case of foosball tables, pool tables and ping pong tables, we suggest the use of the protective cover whenever the piece is outdoors and is not used for long periods of time, such as in winter time.

These care and maintenance tips and recommendations are included in the User's Manual of each one of our products.

Warranty

For two years from purchase date, RS Barcelona warrants that its products to be free from defects in material and workmanship under normal use and the conditions for which it was designed and the product is used for its intended purpose. The warranty is non-transferrable, and is applicable to the original purchaser only. The warranty will be valid only if proper maintenance and cleaning have been carried out in accordance with RS Barcelona's care and maintenance instructions.

This warranty does not apply to faults or imperfections resulting from passage of time or normal wear and tear. Scratches, natural variations in wood grain and Color are characteristic of this natural material and are not included in this warranty. Discoloration or fading of surface materials and Colors due to stains, ultraviolet light, harsh cleaners, etc. are not included in this warranty. Scratches or tears that may occur on the furniture fabric or pool table cloth due to use are specifically excluded from this warranty.

Products which do not conform to the description or which are defective in material or manufacturing will be replaced, repaired or, at rs barcelona's choice, credited for their original purchase price. rs barcelona must be notified of such defect with graphic evidence and description.

Colors Palette

The Colors and textures used by RS Barcelona express timelessness and harmony. With striking purity and sensuality, they enhance the beauty of our items, allowing you to combine tones and create your own Color palette.
